

## **RSI Rain Gutters installing gutters at the Keating House**

**RSI Rain Gutters** (a division of **RSI Roofing**) has signed a contract with the Keating House to install 160 feet of **RSI**'s Custom Copper rain gutters. 150 feet of spout plus custom collection boxes and hangers will also be installed. The Keating House was built in the late 1800's and is considered one of San Diego's "Historical Sites." Since 1983, the Victorian house has served San Diego as an award winning bed & breakfast.

*"There are certain challenges that are involved with such an old building and with guests staying 7 days a week. Our employees are well versed on such projects providing courtesy and sensitivity to the noise,"* Nick Rogers, **RSI Rain Gutter Manager**.
