

RSI Roofing re-roofs in Seaport Village

RSI Roofing of San Diego was recently contracted by Terra Mar Centers to re-roof the Crystal Palace Building in Seaport Village. The re-roof includes a removal of underlayment before installing the 3000 square feet of 40-year Laminated Shingles and 500 feet of Single-Ply TPO. Because of the hazardous asbestos, **RSI** completed the demolition of the old roof at night to avoid interference to the thousands of visitors that visit Seaport Village every year.
