

Owner of **RSI Roofing** Zeros out Electricity Bill with Solar

RSI Solar Services (a division of **RSI Roofing**) recently installed a Solar Panel System for the owner of **RSI Roofing**-David Susi at his residence in Pacific Beach. The first thing **RSI** did was install *Malarkey* Shingles that are Title-24 & Cool Roof Rated which helps offset the heat that enters his home. Then the Solar division came in and installed a 20 panel system by *Canadian Solar* with an *SMA Sunnyboy* Inverter, which will generate enough energy to completely zero out his electricity bill. *“We feel Solar is the best energy saving, cost cutting, sustainable solution for both your business and residence. I’m enjoying my personal system and I know our customers will too,”* David Susi, president-**RSI Roofing**
